## Stoke Mandeville Hospital

**Project:** Stoke Mandeville Hospital  
**Sector:** National Health Service  
**Product:** Compactus Power<sup>3</sup>  
**Storage of:** Medical Records  
**Installation date:** 2006  
**Completed by:** Dexion South West, Bristol

Stoke Mandeville Hospital employed Dexion South West to design and install a medical records store. Dexion South West offered the client to install a system that is future proof and that has exceptional automatic user safety – Compactus Power<sup>3</sup>. Stoke Mandeville Hospital could see the outstanding benefits of this system and agreed to install Compactus Power<sup>3</sup>.

Compactus Power<sup>3</sup> is operated by a touch panel located on the operating end of the mobile system. The intelligent control system of compactus Power<sup>3</sup> looks after the safety of all users with a passive safety system. This ensures that users check an open aisle before they can open another.
